

# LED STAGE

## CAR PROCESS

Great Point Studios has partnered with 4Wall Entertainment to bring cutting-edge virtual production capabilities to our Woodworth Avenue campus.

This collaboration features a 5,000 sq. ft. LED volume stage designed by 4Wall, combining real-time technology, photorealistic environments, and advanced motion capture. While optimized for car process scenes, the stage is fully adaptable for a wide range of production needs—empowering filmmakers to create faster, more efficiently, and with greater creative freedom.

The Car Process Stage is just the beginning. Through our partnership with 4Wall Entertainment, we're equipped to meet advanced video production needs across all of our stages.

Stage 7 also includes a 5,000 sq. ft. support area with a green room, dressing rooms, and a lounge to ensure smooth on-site operations. Moreover, Woodworth Avenue is located near our central Wells Avenue campus and is adjacent to the Yonkers Metro North station.
